Senior or Principal Structural Engineer

LOCATIONS: HOUSTON, TX AND BRADENTON, FL

Travel: Up to 30%

Reporting to the VP and Group Director, the Structural Engineer will lead forensic evaluations, conduct damage assessments, condition surveys, structural analyses and modeling, run tests utilizing our laboratories, provide expert witness testimony, and develop design repair and rehabilitation plans for a variety of structures. The engineer will help ensure group profitability by generating business to sustain self-productivity and the productivity of others within the firm, explore and develop new markets with other senior staff and build and sustain effective relationships with current and potential clients. The engineer will be expected to aid in the development of junior staff through mentoring and coaching, while scheduling, coordinating, and delegating project work. The engineer will also analyze and interpret project results and prepare reports, proactively participate in professional organizations and technical committees, and author technical papers and make presentations at professional conferences.

The candidate will have at least a Bachelor's Degree in Civil / Structural Engineering. An advanced technical degree is preferred. This opportunity requires at least ten (10) years of relevant technical consulting experience and a track record in developing strong relationships resulting in business development success with clients in the regional area. The candidate must hold an active professional or structural engineering license in Texas or Florida or have the ability to obtain one within the first six (6) months of employment.

Candidates for Texas can submit resumes with desired compensation to: SrStructEngTX@ctlgroup.com

Candidates for Florida can submit resumes with desired compensation to: SrStructEngFL@ctlgroup.com

Senior or Principal Materials Engineer

LOCATIONS: HOUSTON, TX AND BRADENTON, FL

Travel: Up to 30%

Reporting to a Group Director, the engineer will provide expert technical consulting services related to the behavior and performance of construction materials. The engineer will help to ensure group profitability by generating business to sustain self-productivity and contribute to the productivity of others within the firm, explore and develop new markets with other senior staff, and build and sustain effective relationships with current and potential clients. The engineer will be expected to aid in the development of junior staff through mentoring and coaching, while scheduling, coordinating, and delegating project work. The engineer will also analyze and interpret project results and prepare reports, proactively participate in professional organizations and technical committees, and author technical papers and make presentations at professional conferences.

The candidate will have at least a Bachelor's Degree in Civil Engineering, Materials Science and Engineering, or a related discipline with a materials focus. An advanced technical degree is preferred. This opportunity requires at least ten (10) years of relevant technical consulting experience and a track record in developing strong relationships resulting in business development success with clients in the regional area. The ideal candidate will have expertise in concrete and cement-based materials, with consulting experience in any of the following: concrete construction practices, mixture optimization, high performance concrete, mass concrete, durability and service life, corrosion, or Non Destructive Testing. Expertise in metals and polymers is a plus. The candidate must hold an active professional engineering license in Texas or Florida, or have the ability to obtain one within the first six (6) months of employment.

Candidates for Texas can submit resumes with desired compensation to: SrMaterlsEngTX@ctlgroup.com

Candidates for Florida can submit resumes with desired compensation to: SrMaterlsEngFL@ctlgroup.com

Senior or Principal Architect – Building Enclosure & Stucco Cladding

LOCATION: BRADENTON, FL

Travel: Up to 30%

Reporting to the Group Director, the Architect will lead forensic and diagnostic field investigation projects, conduct testing and utilize our in-house petrographic, chemical, and structural laboratories, provide litigation support and expert witness testimony, and develop repair and rehabilitation designs. The architect will help ensure group profitability by generating business to sustain self-productivity and the productivity of others within the firm, explore and develop new markets with other senior staff, and build and sustain effective relationships with current and potential clients. The architect will be expected to aid in the development of junior staff through mentoring and coaching, while scheduling, coordinating, and delegating project work. The architect will also analyze and interpret project results and prepare reports, proactively participate in professional organizations and technical committees, author technical papers, and make presentations at professional conferences.

The candidate will have at least a Bachelor of Architecture degree. An advanced technical degree is preferred. This opportunity requires at least ten (10) years of experience in relevant technical experience and a track record in developing strong relationships resulting in business development success with clients in the regional area. The candidate must hold an active U.S. architecture license and the ability to obtain a Florida license within the first six (6) months of employment.

Candidates can submit resumes with desired compensation to: SrArchitectFL@ctlgroup.com
